The three patient groups correspond to control patients (Ctrl), patients with atrial dilatation (AD), and patients with atrial fibrillation (AF). Data are numbers (n) and percentages (%), mean ± standard deviation or median [interquartile range], as pertinent. Statistical differences were consistently assessed by Pearson's Chi Square, ANOVA or Kruskal–Wallis tests. Significant differences are highlighted in bold character. AVR, aortic valve replacement; CABG, coronary artery bypass grafting; LA, left atrium; LVEF, left ventricular ejection fraction; MVR, mitral valve replacement; NS, non-significant.
