# How to Configure Sophos Anti-Virus for Home Systems

When you download and install Sophos on your home computer, on-access scanning is enabled. However, the settings for scheduled scans and scanning for spyware are not configured. This gives you the freedom to set the program up to suit your schedule and needs.

This document gives step-by-step instructions for setting up full-system scans with recommended settings as well as other configurations within the program such as scheduled scans.

## Index

- 1) [How to Configure On-Access Scanning to Scan for Spyware](#)
- 2) [How to Setup a Full System Scan](#)
- 3) [How to Enable Sophos Live Protection](#)
- 4) [How to Enable Sophos Suspicious Behavior Detection](#)
- 5) [How to Enable Sophos Web Protection](#)

## Configure On-Access Scanning to Scan for Spyware

Sophos is pre-configured for on-access scanning. This means the program will check each file you access to ensure it is not infected. By default, on-access scanning is set up to check for viruses, but not spyware or adware. To set Sophos up to check for viruses and spyware with on access scanning:

1. Right-click on the Sophos shield in the taskbar. A menu will appear. Click on "Open Sophos Endpoint Security and Control."

**NOTE:** When using Windows 7, if you don't see the icon then you may need to left-click the up-arrow in the taskbar **FIRST**.

2. When the Sophos Anti-Virus program opens, select "Configure Sophos Anti-Virus."
